Science Café, 5 februari 2024 **Radboud University Nijmegen**

# Broader spectrum of neurodevelopmental disorders

## **ADHD - Core Symptom Areas**

**Inattention**

**Impulsivity/Hyperactivity**

# Autism Spectrum Disorder

**Social-communication  
deficits**

**Fixated interests,  
repetitive behaviours, and  
abnormal sensory processing**

# Neurodevelopmental Disorders

- Extreme of normal variation
- Quantitative variation
- Neurodiversity
- Dimensional modal

## 4 D's

- Disease,
- Disorder
- Disability
- Difference

## Controls

## Cases

- Disease
- Abnormality
- Qualitative differences
- Psychopathology
- Categories

**These neurodevelopmental disorders are thought to result from the disruption of normal brain development and related neurobiological mechanisms during the prenatal and early postnatal period**

The developmental “snowball” rolls downhill over time.....

.....gathering speed and mass (loadings for psychopathology and atypicality).

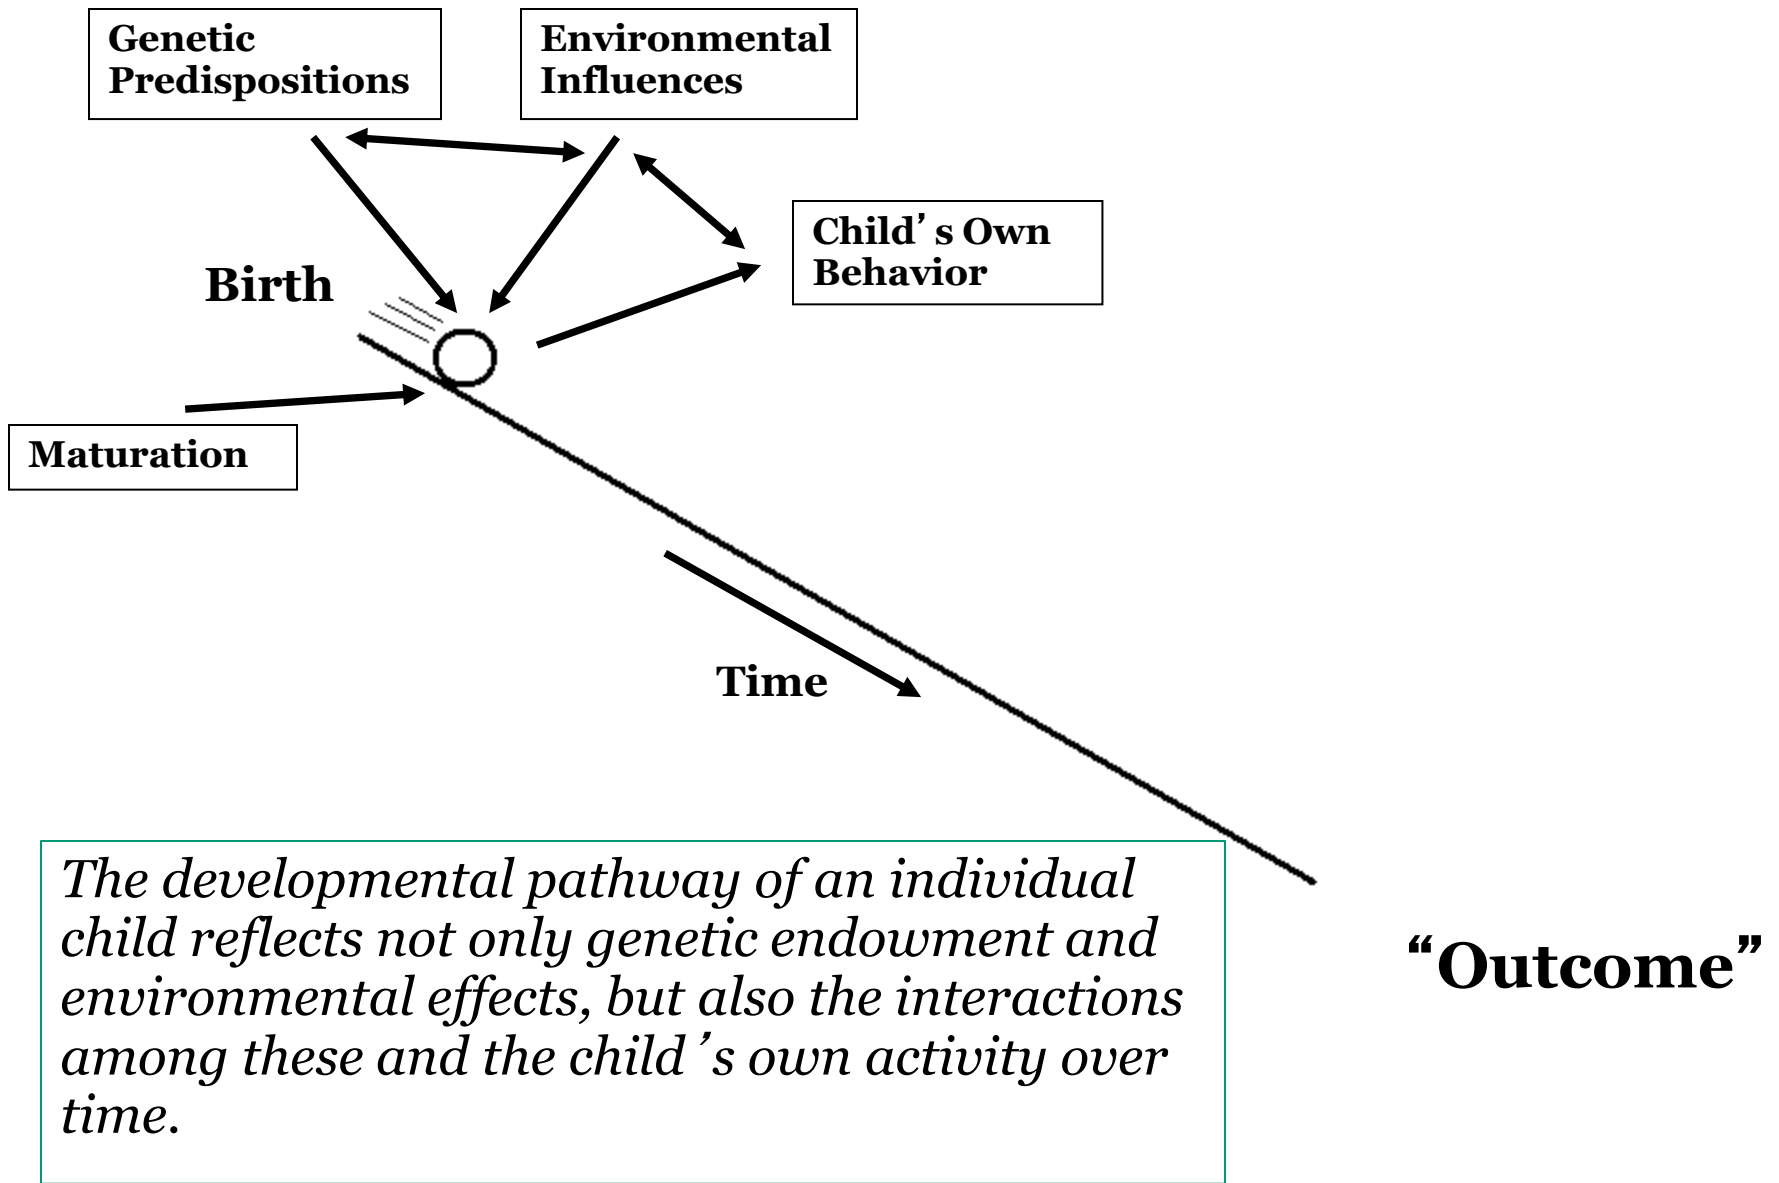

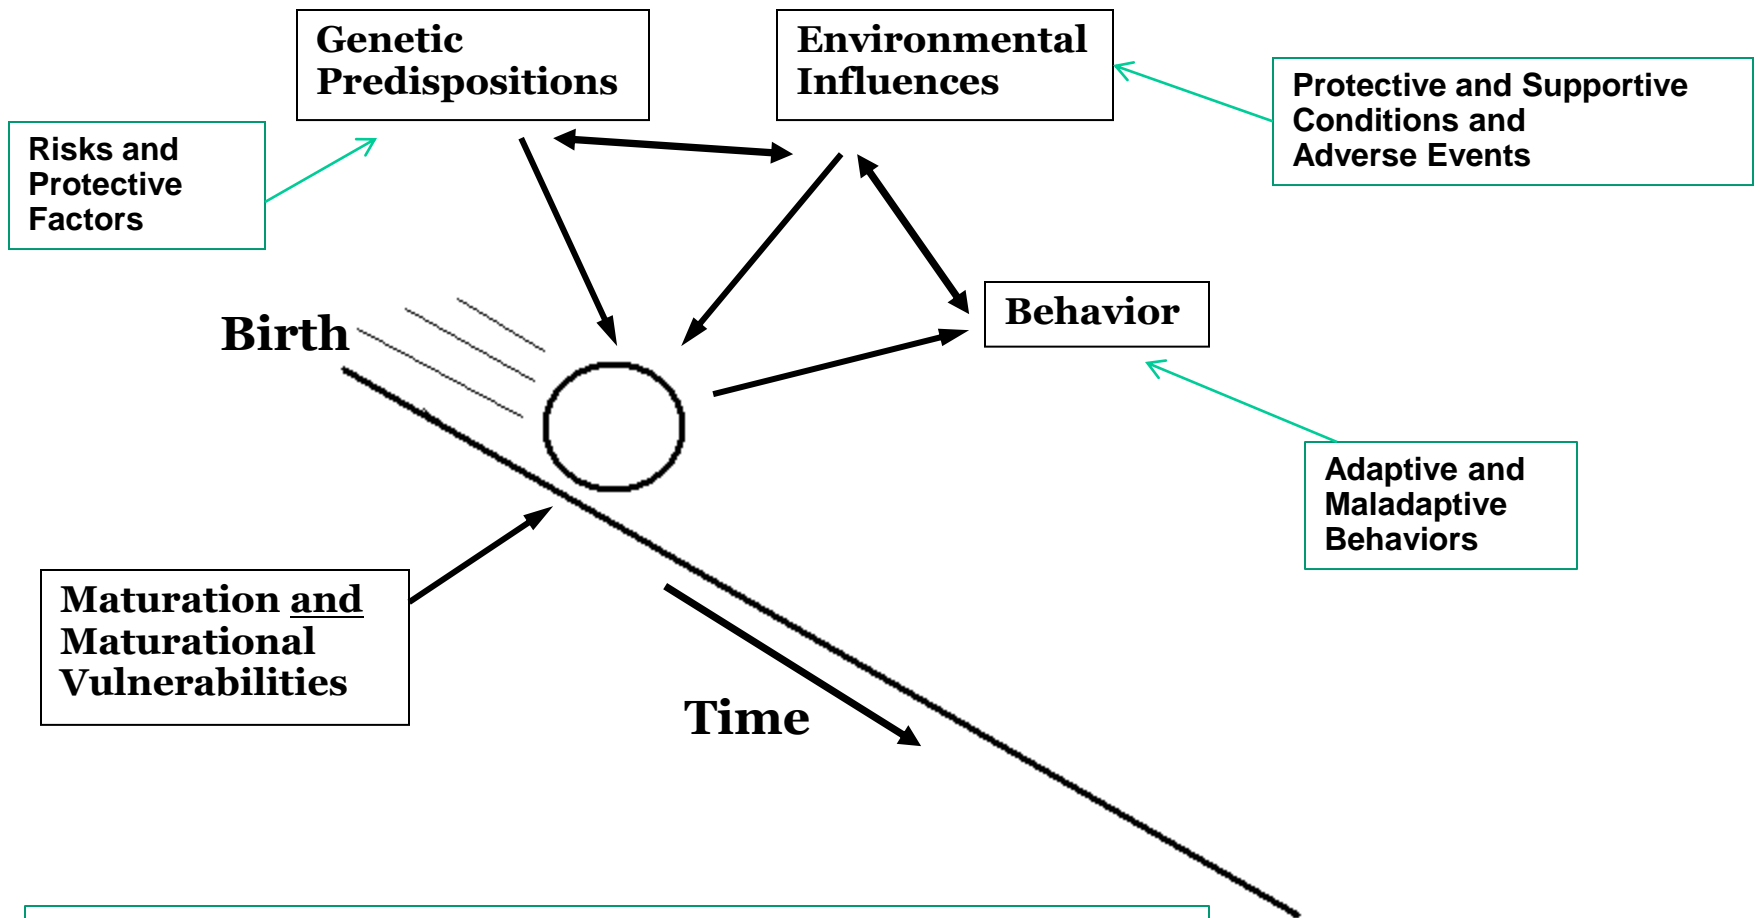

**“Outcome”?**

.....gathering speed and mass (loadings for psychopathology and atypicality).

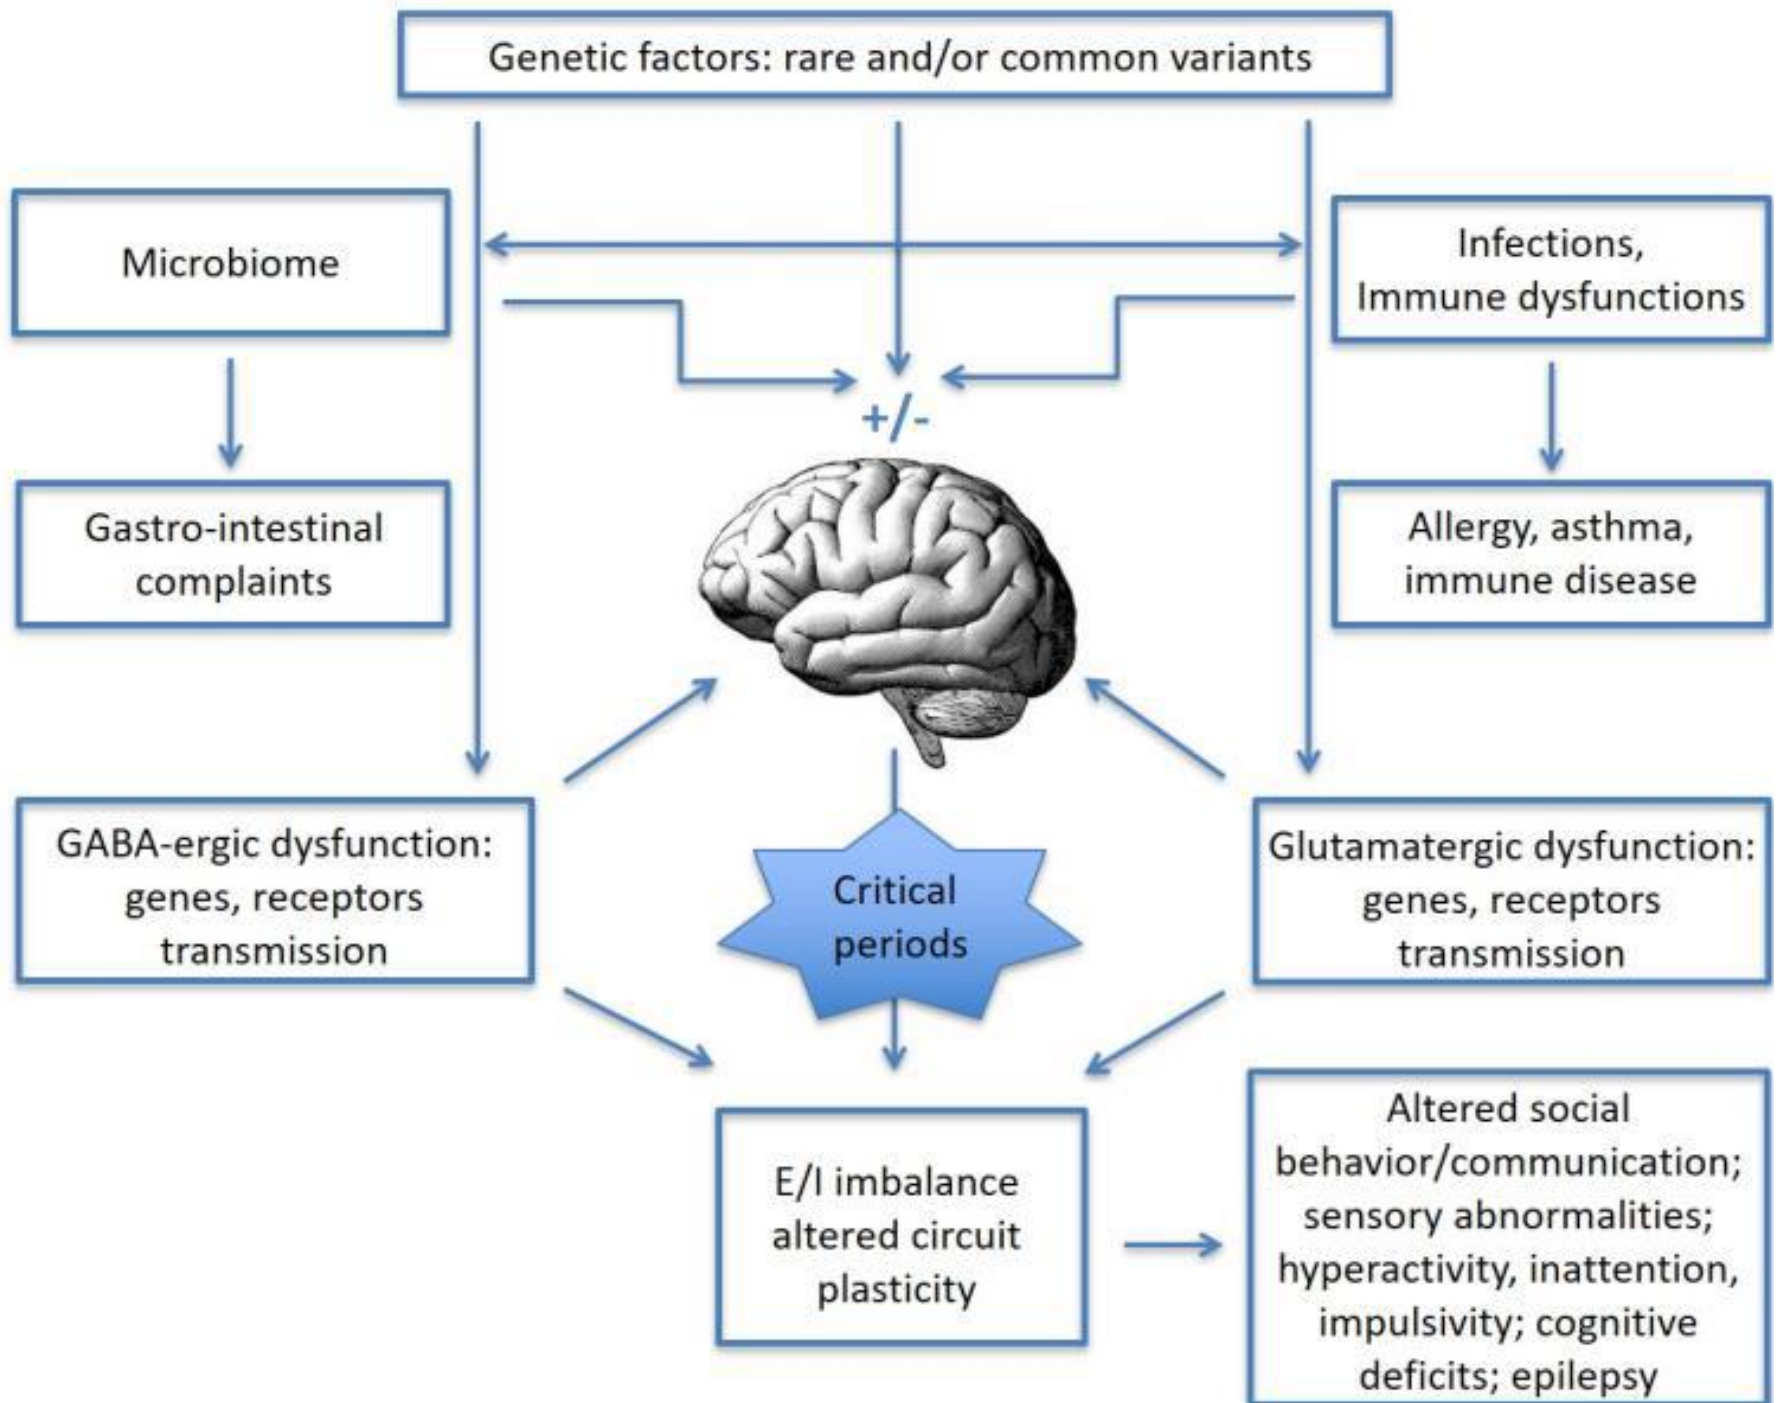

**“Outcome”?**

*Influences on development are both positive and adverse. Likewise, the individual's behaviors over time are both adaptive and maladaptive.*

**Key words**

**Stratification / subtyping**

**Biomarkers**

A biomarker is always about predictions that can be made for a particular individual.

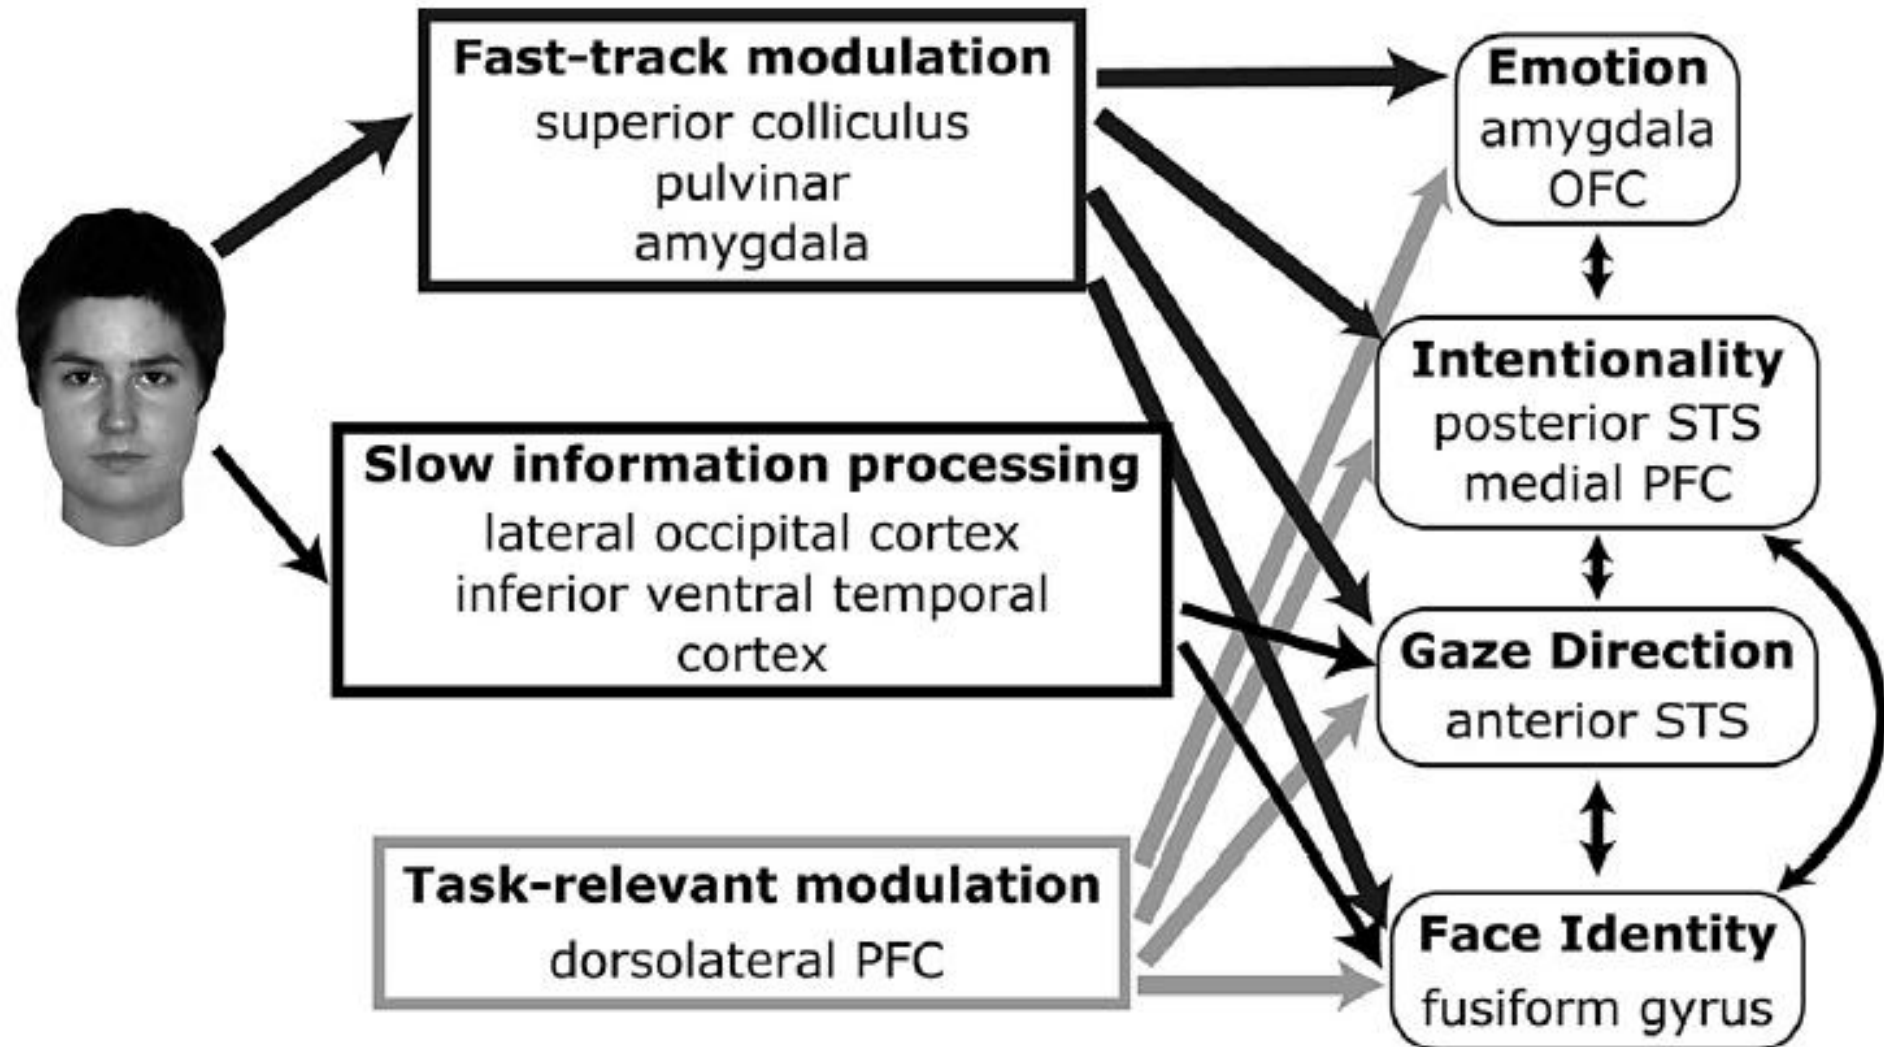

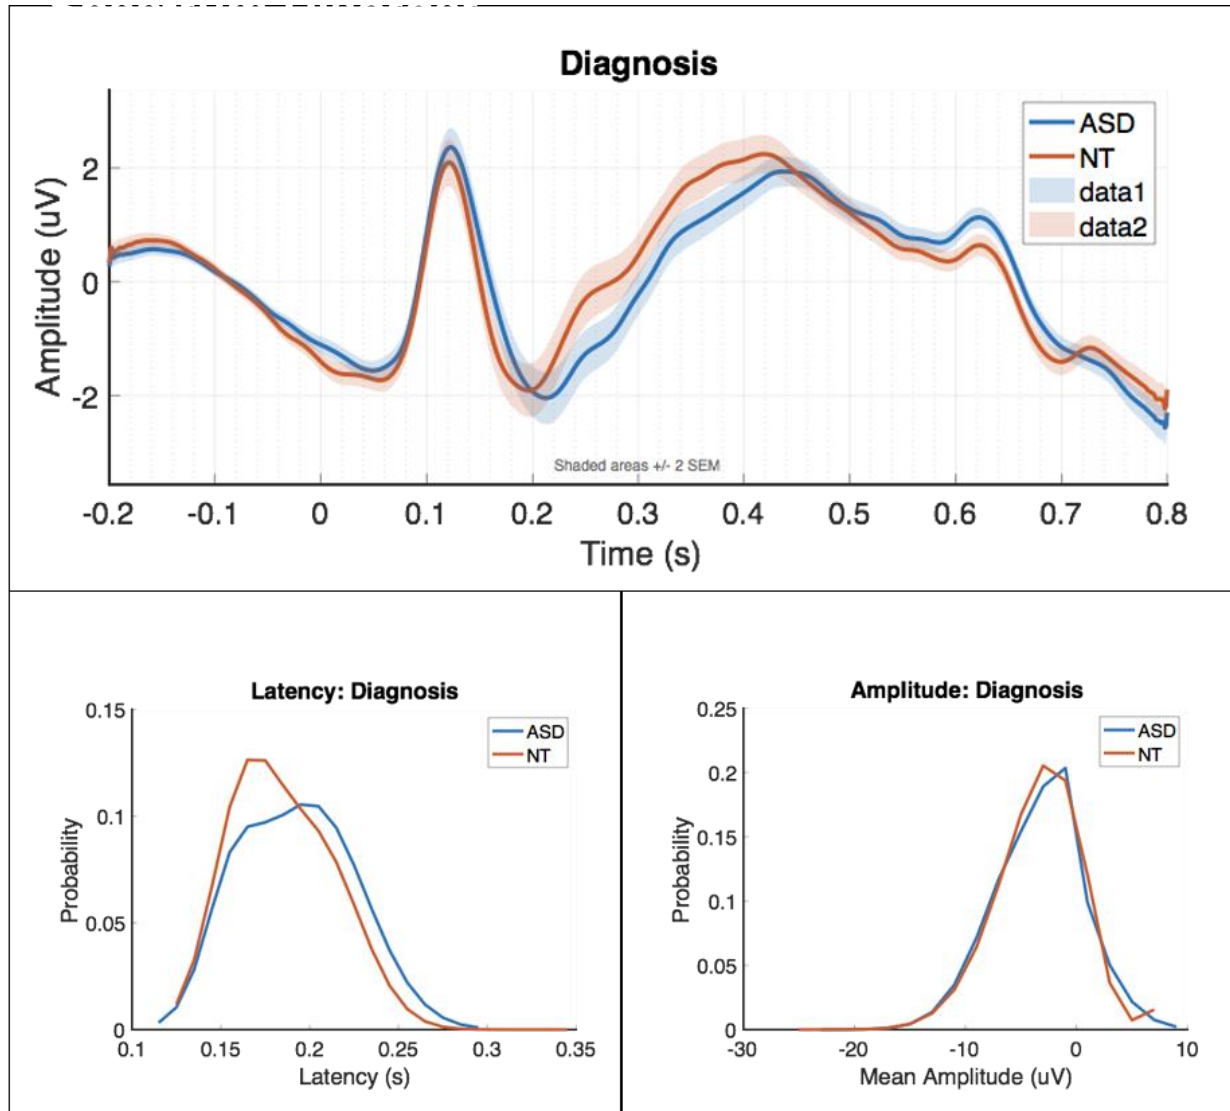

# Types of biomarkers

Type of biomarker	Purpose	Setting / samples
Diagnostic marker	Predict ADHD classification (DSM-5 / ICD-11)	Clinical and research setting; Decision support tool
Risk marker	Detect ADHD earlier Can be used to stratify early risk groups / paths	High-risk infants, high-risk preschoolers
Prognostic marker	Predict symptom progression / remission Predict psychiatric and somatic comorbidity	From preschool to childhood; from adolescence to adulthood
Predictive marker	Predict treatment response	RCTs and observational clinical settings
Stratification marker	Detect homogeneous subgroups	Preschoolers, children, adolescents, adults

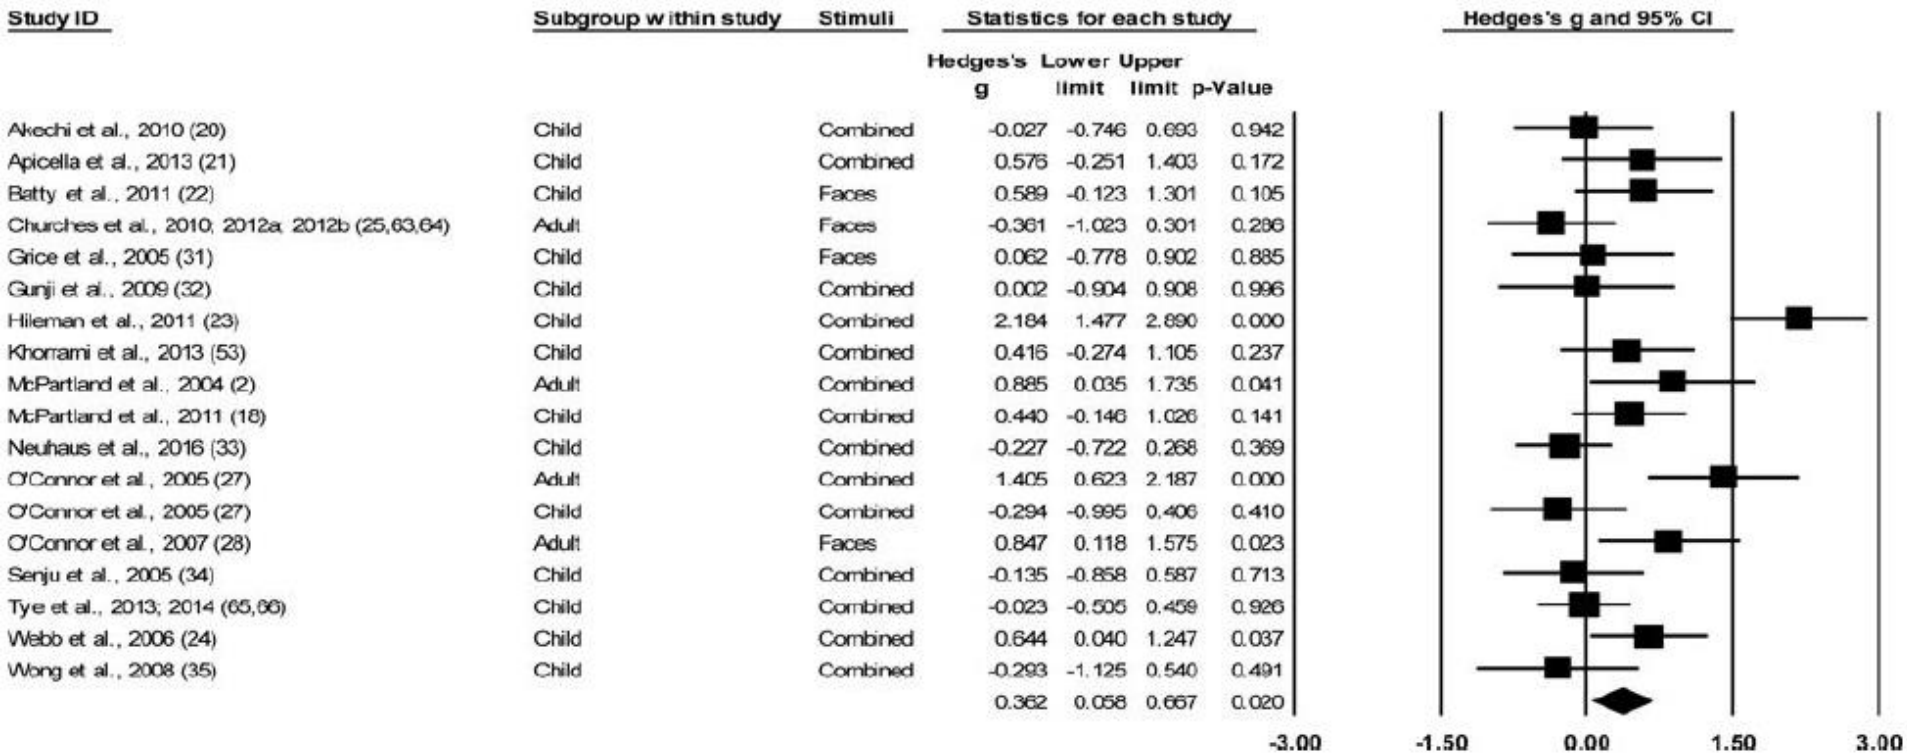

# Face processing – face perception

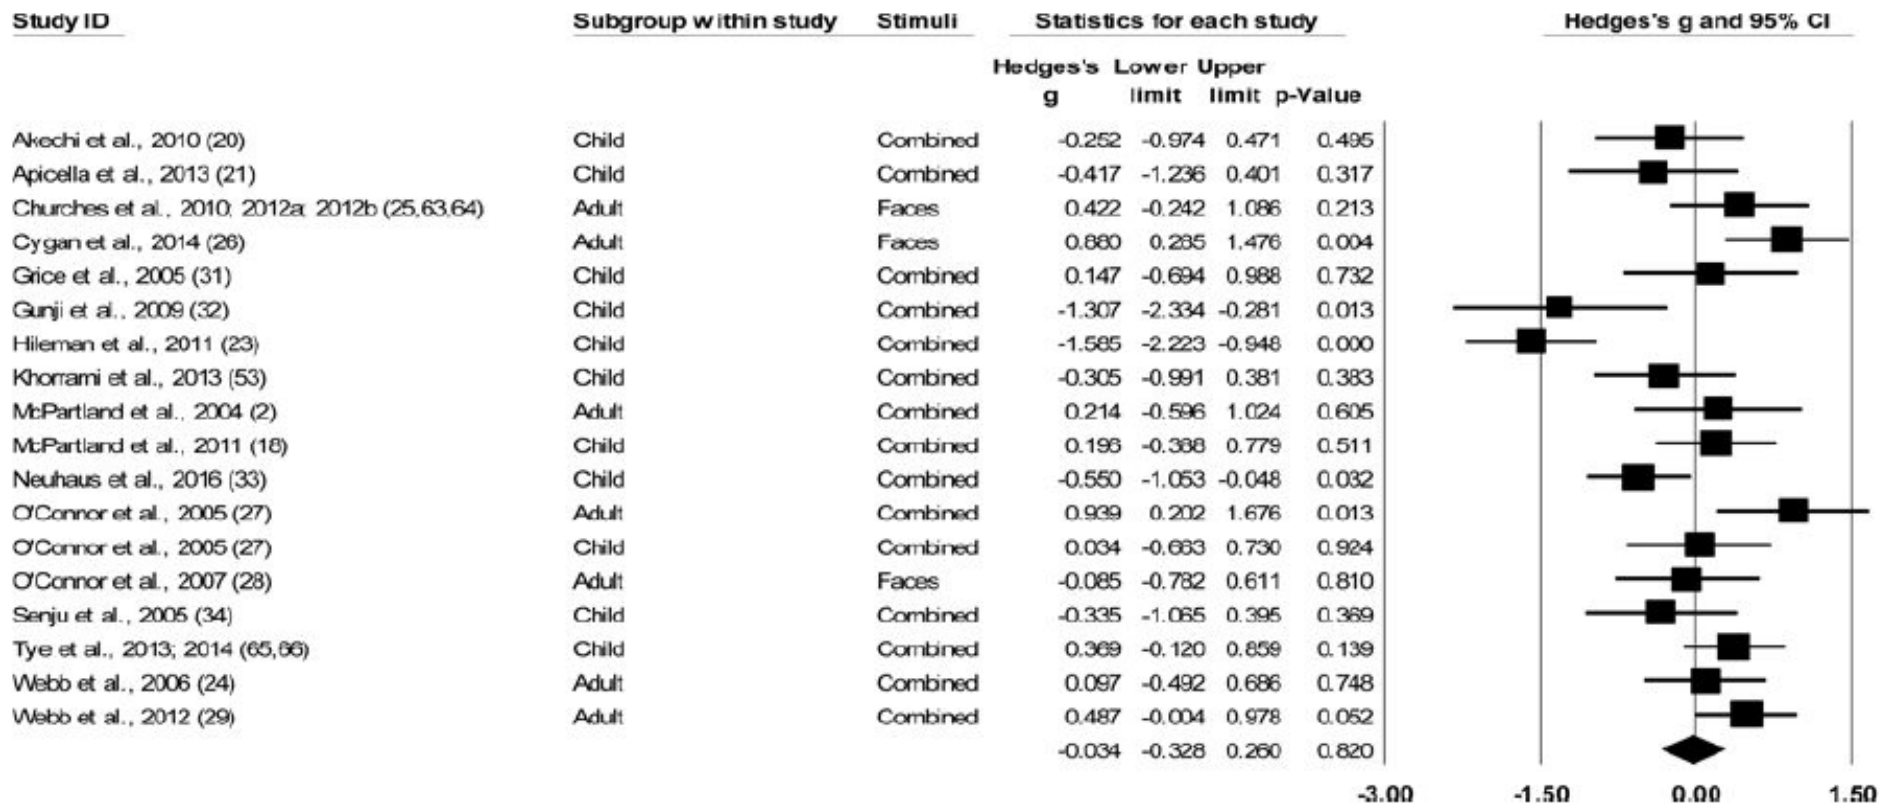

# Biomarker proposal to EMA

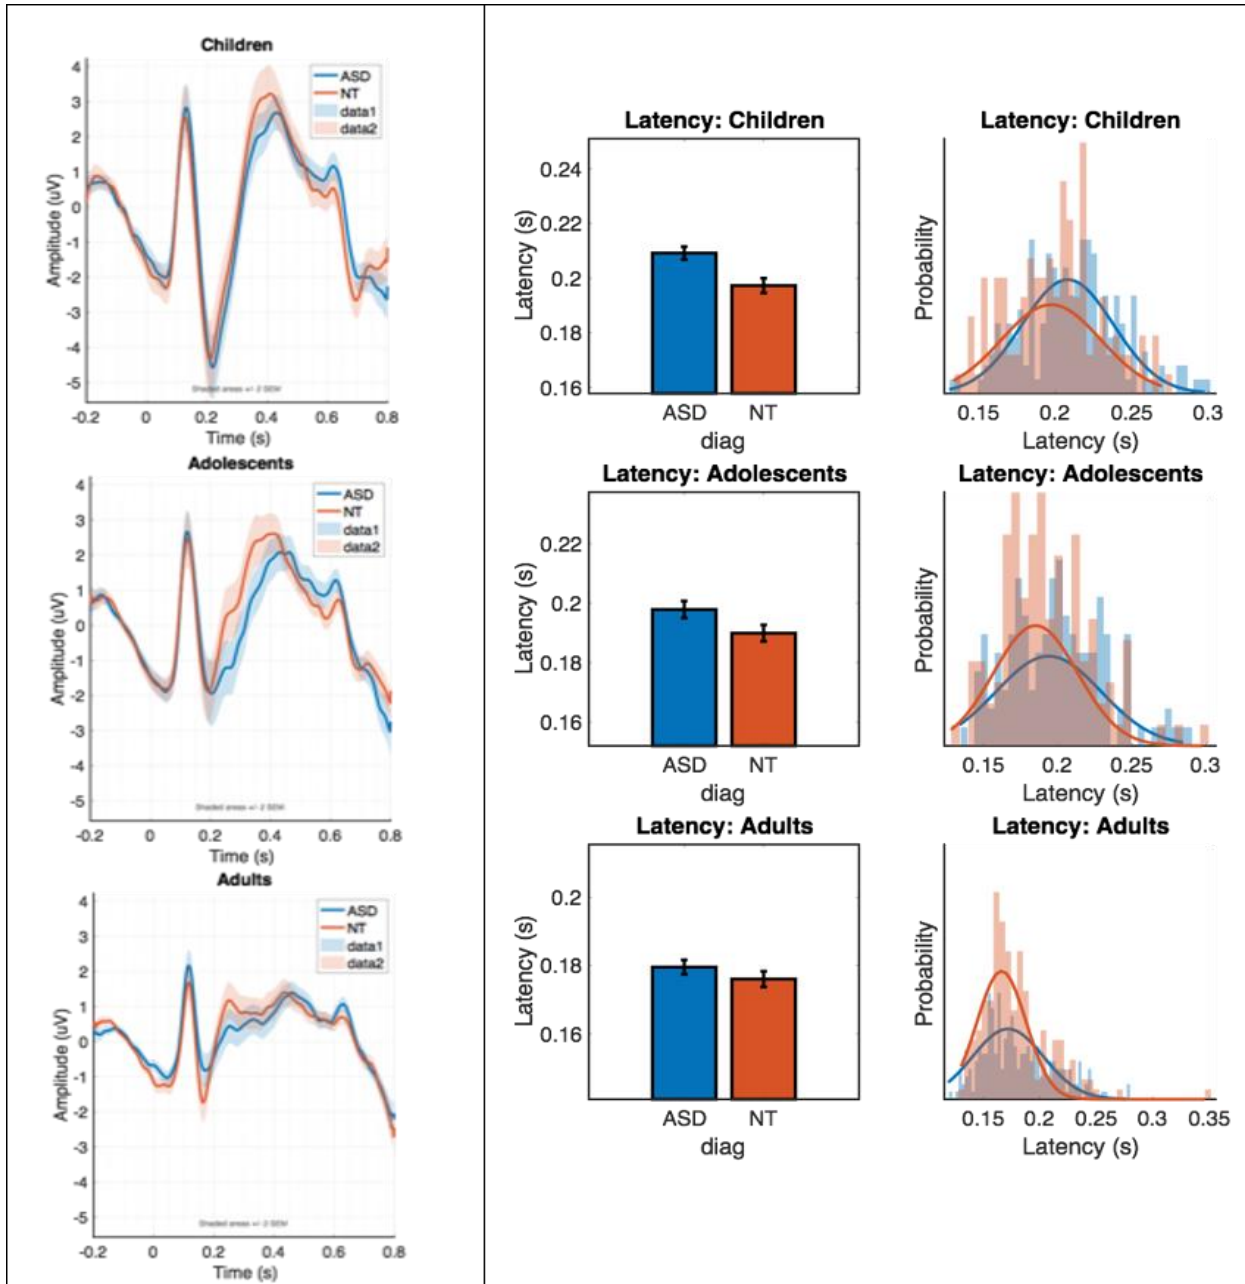

# Meta-analysis of N170 latency

# Meta-analysis of N170 amplitude

# Biomarker proposal to EMA

# Confounder ?

**Partial Correlations for Association between N170 latency at P7/P8 to Upright Faces and Associated Symptoms, Controlled for Age**

<b>N170 latency P7/P8</b>	<b>ASD group</b>
<b>Verbal IQ</b>	$r(239) = -0.049, p = 0.448$
<b>Performance IQ</b>	$r(240) = -0.096, p = 0.137$
<b>DAWBA ADHD</b>	$r(160) = 0.011, p = 0.888$
<b>DAWBA internalising</b>	$r(211) = 0.049, p = 0.476$
<b>DAWBA externalising</b>	$r(211) = 0.045, p = 0.513$

**→ No influence of comorbidities**

# Biological plausibility - convergentie

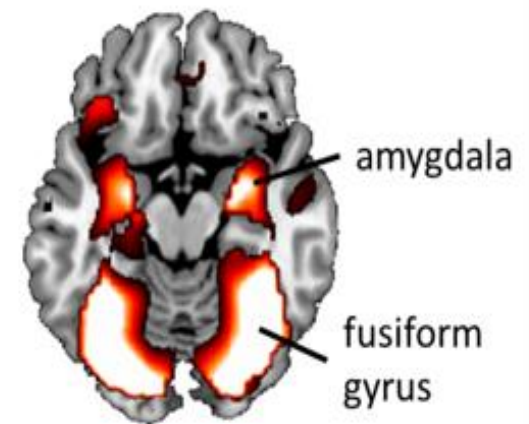

A) Condition 1:  
Emotional face matching

B) Condition 2:  
Shape matching

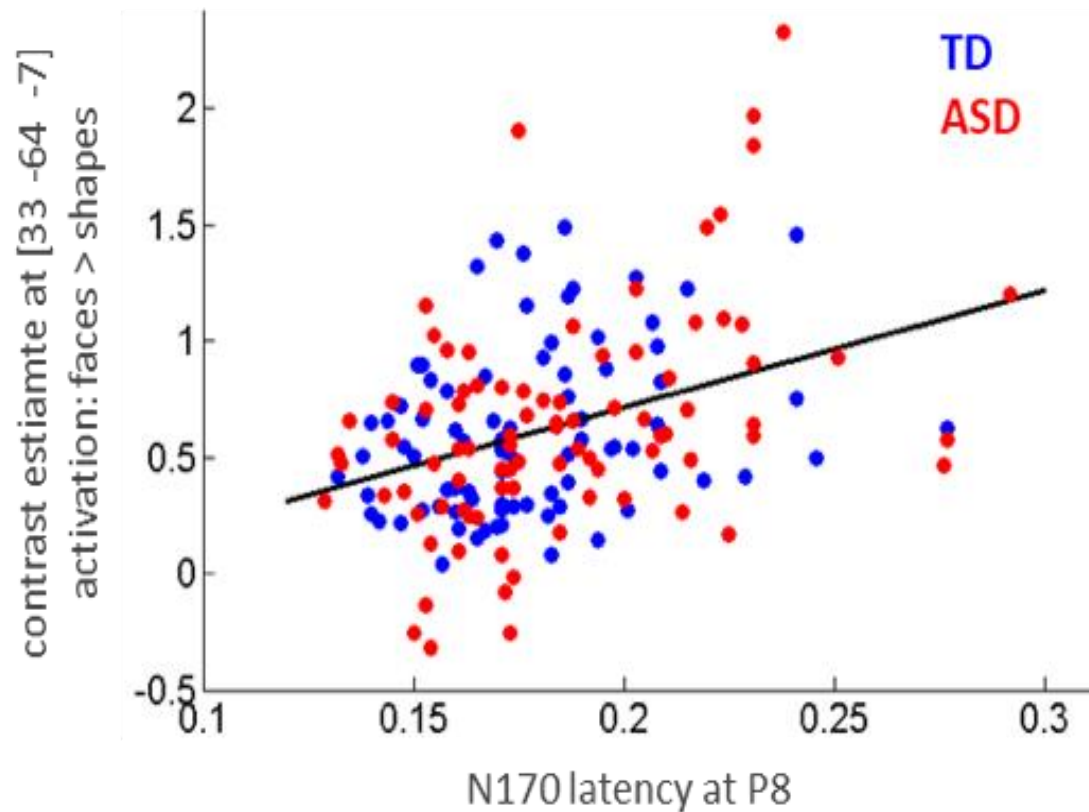

C) Functional activation in  
contrast „faces > shapes“

# Biological plausibility - convergentie

# Biological plausibility - convergentie

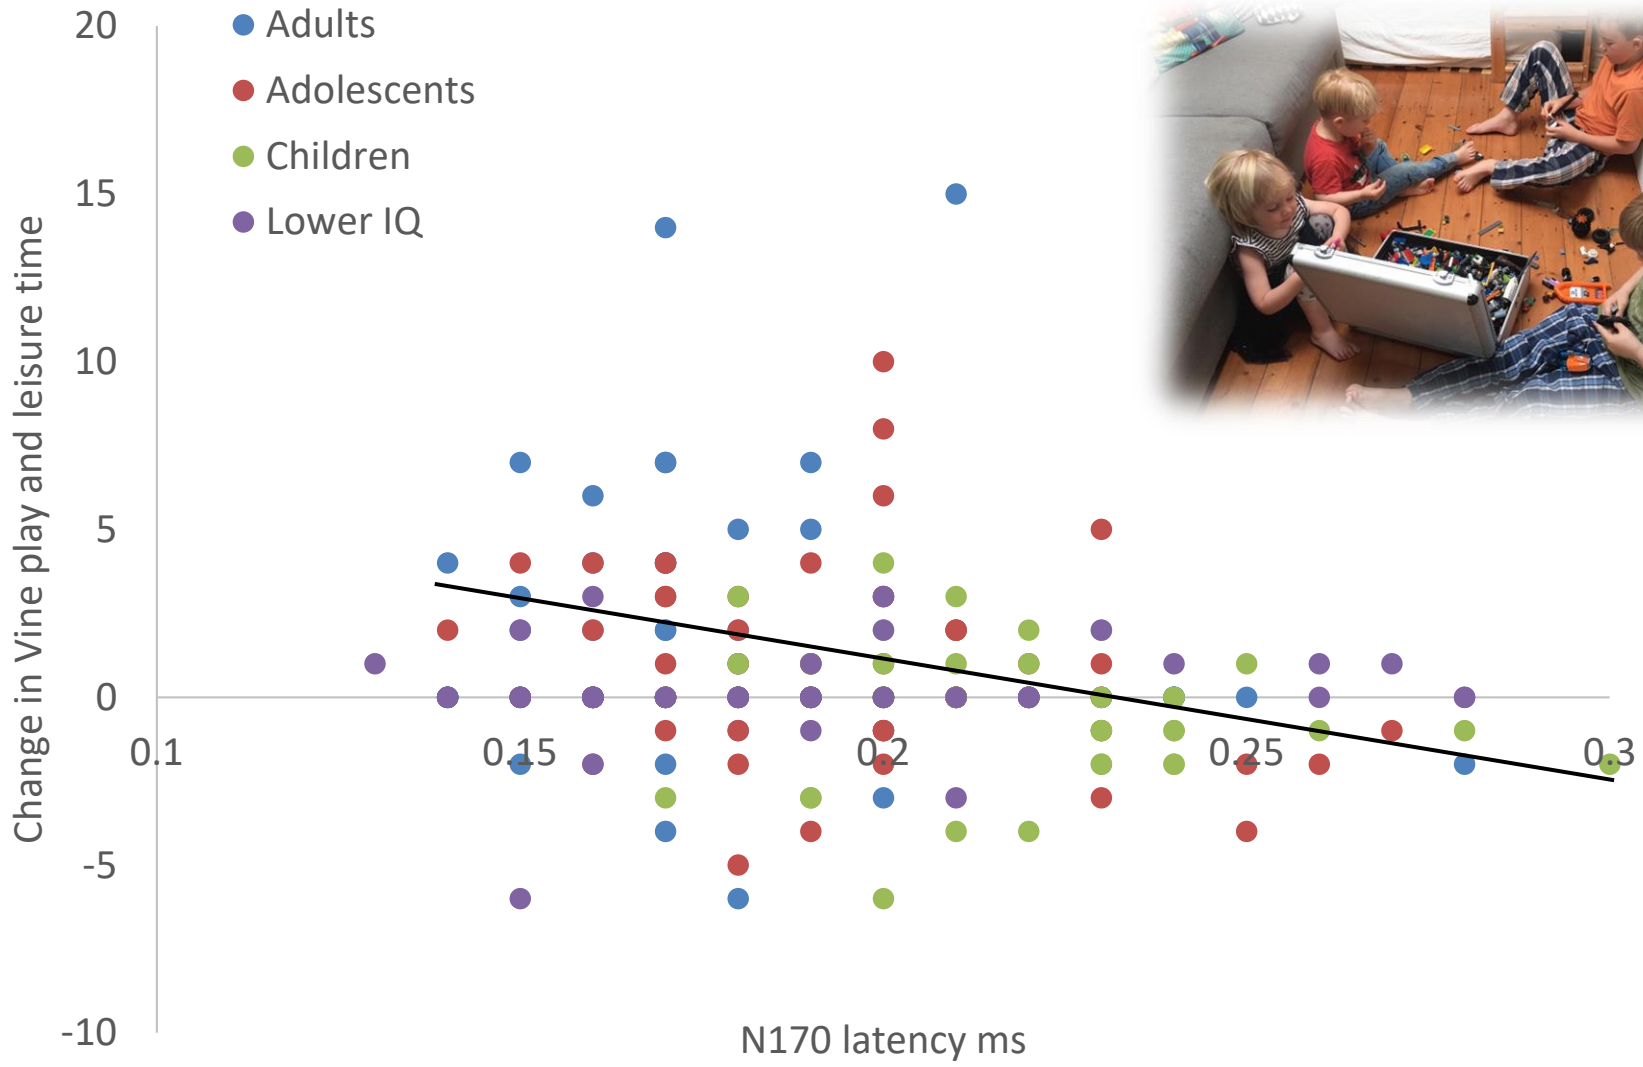

# N170 and prediction of outcome

**Association of the N170 Latency to Upright Faces at P7/P8 at Baseline with the Vineland Socialisation Subscale Scores at Baseline and at a Longitudinal Follow-Up Visit within the ASD Group**

<b>Subdomain</b>	<b>Baseline Assessment <sup>a</sup></b>	<b>Follow-Up Assessment <sup>b</sup></b>
	<b>N=213 with EEG and Vineland at baseline</b>	<b>N=145 with baseline EEG +Vineland at follow-up</b>
Coping	$r(208) = 0.010, p = 0.880$	$r(141) = -0.05, p = 0.538$
Interpersonal Relationships	$r(209) = -0.063, p = 0.366$	$r(137) = 0.022, p = 0.796$
Play and Leisure Time	$r(209) = 0.014, p = 0.838$	$r(141) = -0.235, p = 0.005 c$

# N170 and prediction of outcome

# Een nieuwe kijk op ADHD en autisme

Old concept	Modernised concept
Risk factors	Protective and risk factors; resilience
Symptoms	Symptoms plus functioning, wellbeing, QoL
Deficits	Strengths and weaknesses
Behavioural descriptions	Biological, genetic, cognitive and behavioural measures as input for precision medicine
Categoric / binary view	Dimensional view
Service and clinician-based care	Shared decision making, Self-management
Face-2-Face consultations	F-2-F and digital interventions / guidance
